

# Sinusoidal Corrugated Metal Wall Panels

## PRODUCT DESCRIPTION

Our corrugated panels are a ventilated curtain screen wall system. Panels are machine produced in a tradition sine-shaped profiles. Metal Tech-USA has a wide range of perforating capabilities allowing for variance in the perforated space, free (non-perforated) space, and perforating patterns. Traditional fastening calls for exposed fastening directly through the panel surface using appropriate screws with sealing washers or riveting.

Corrugated panels are used for their design characteristic of a slight exchange of light and shadow creating an impression of strength in an easily installed and maintained system. With unlimited perforation possibilities, our corrugated perforated panels fill a niche as screen panels allowing for various amounts of light penetration. Panels can be installed both vertically and horizontally, making our corrugated panel one of the most versatile and cost-efficient cladding systems in the market today.

## FEATURES & BENEFITS

- Easy to install and maintain.
- Unlimited perforation possibilities.
- Virtually maintenance-free.
- Wide range of available colors.

## AVAILABLE METALS

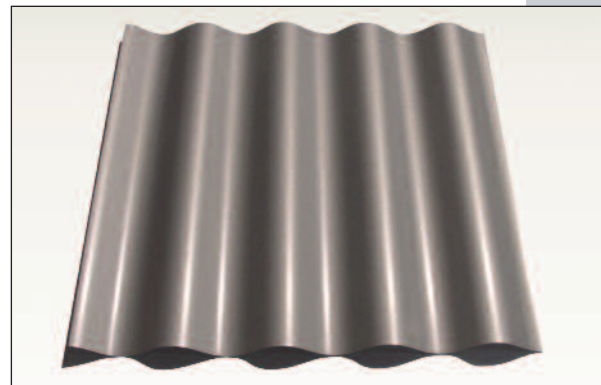

- Zinc
- Aluminum
- Copper
- Cor-ten steel
- Titanium
- Stainless steel

## SPECIFICATIONS

### Standard Dimension & Weight, Zinc\*

Thickness	0.032"(0.8mm) & 0.040" (1.02mm)
Center to Center	2.67" (6.78cm)
Corrugation Height	0.875" (2.22cm)
Installed Widths:	
PWBG	Siding 31.00" (78.74cm)
	Roofing 28.41" (72.16cm)
PWGG	Siding 20.95" (53.21cm)
	Roofing 18.25" (46.35cm)
Finished Panel Dimensions:	
PWBG	10' (3.05m) x 33.75" (85.75cm)
PWGG	10' (3.05m) x 23.64" (60.04cm)
Material Stretch Out:	
PWBG	10' (3.05m) x 39.40" (100.08cm)
PWGG	10' (3.05m) x 27.60" (70.10cm)
Approximate Panel Weights:	
PWBG	0.8mm 38.72 lbs (17.56kg)
	1.0mm 48.56 lbs (22.03kg)
PWGG	0.8mm 27.14 lbs (12.31kg)
	1.0mm 34.04 lbs (15.44kg)

\* Other metal specifications available upon request.
